PROJECTS

Shadow Graden   2023

This project consists of two parts. Games and Website POS That have many feature to get items for example buy, auction and gacha I was tasked with developing a website using React in terms of creating an APIs, e.g. an API for Sign-up, Sign-in and CRUD.

POS-Shop   2023

This project is a POS website that connects to NFC reader, I was tasked with developing a website using React.

D2Ubon   2023

Project in TESA Top Gun Rally 2023 has a topic: water management systems. The work is divided into three parts: hardware, servers, and data analysis, I take care of the hardware for collecting images to train the AI, predict water levels and send data to the server.

PP Translator   2023

This project is to create a language translator that can translate both text and images. I was given the responsibility for the images using OCR.
